About

The year is 10,036 and we're on Savage Soland. Chaos has erupted. 1,000 Genesis CyberVillainz, previously mutated heroes—now imposing pixel beasts—are agonizing the world. Little do they know... The Heroez are coming back.

CyberVillainz X Heroez

Roadmap

DONE

Improvements

- Wallet tracking tools

$BROCCOLI Utility

- WL & NFT raffles
- Legendary auctions
- Project Dolphin

SOON

First Comic

Alpha Bot

Merch Store

Discord Trading Tools

Cyber Heroez

Sniper Bot

More...

ALPHA

CyberVillainz Alpha DAO will be the differentiator between our community and the average NFT project's alpha channel.

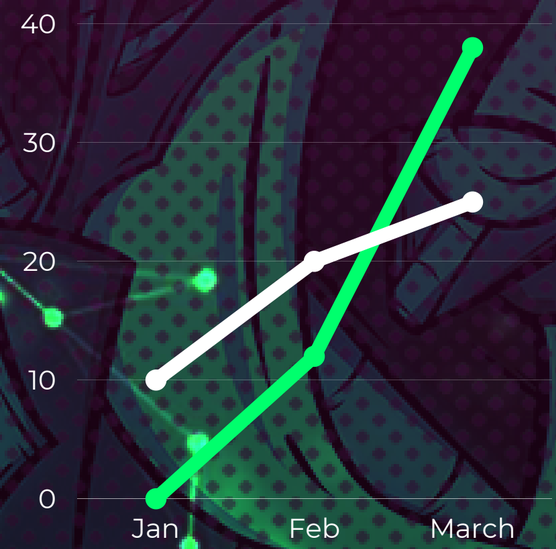
CyberVillainz will professionalize alpha with a wide array of analysis and points of view:

- Rapid Fire Analysis
- Long Form Analysis
- Mint Plays
- Secondary Signals
- Wallet Trackers of 15 Influencers

We will relentlessly pursue opportunities to win as a group.

CyberVillainz X Heroez

We have more paid callers than other projects.



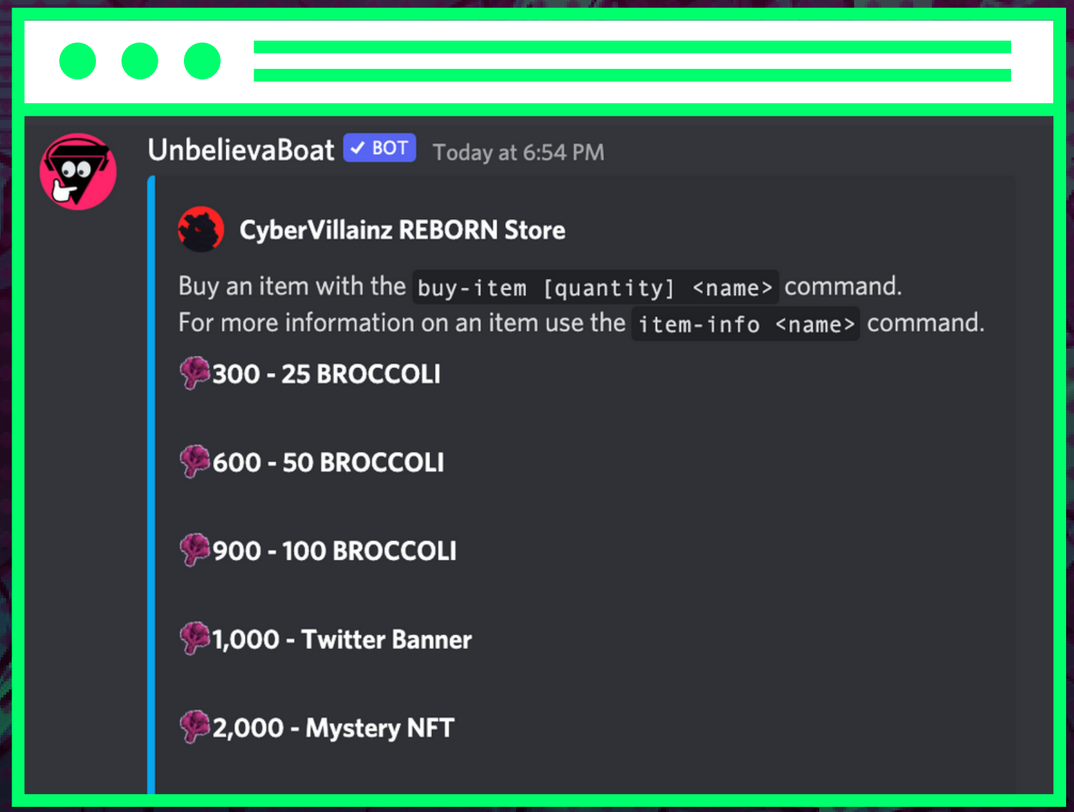
We only hire callers with proven success in the space.

Reward Economy

Your ideas, your creativity, and your time have worth. We will pay members virtual currency who contribute through an intuitive Discord economy that will reward holders for their time and effort.

Rewards will be determined through points that can be redeemed for $BROCCOLI, NFTs, and custom social media content.

The activities to receive rewards and the amount of points given will be changed regularly and communicated in the Discord.



CyberVillainz X Heroez

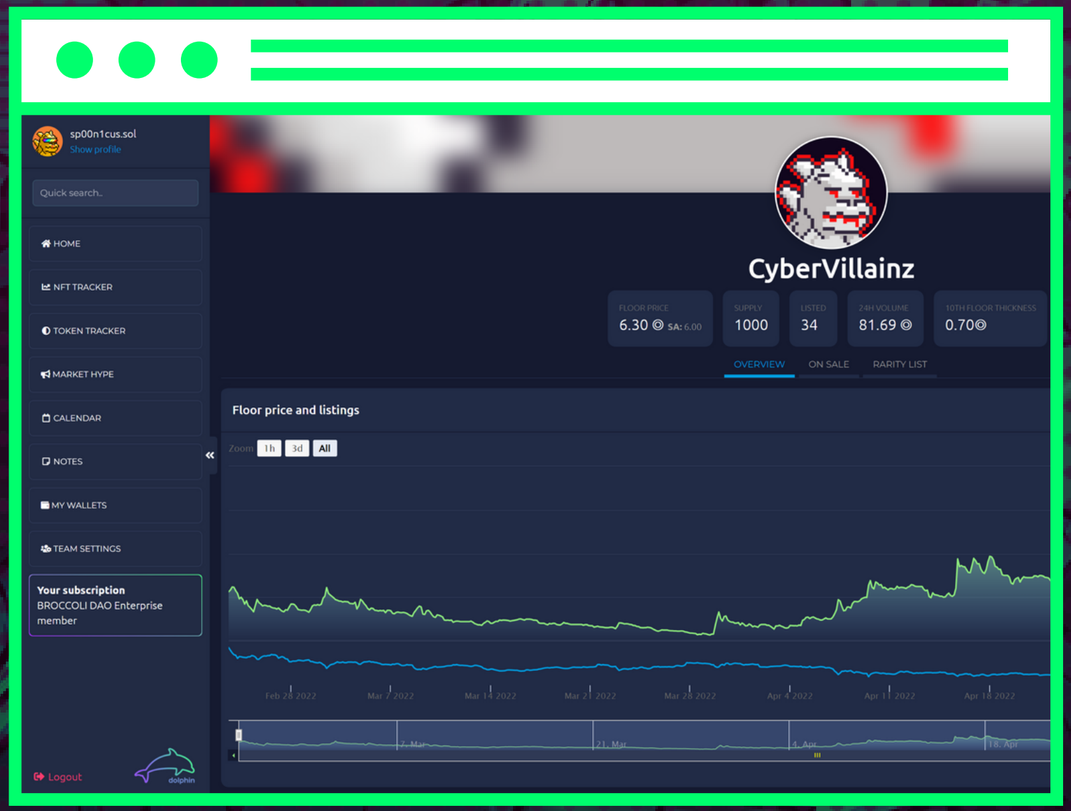
Project Dolphin

Project Dolphin is a dashboard and a suite of tools to help NFT investors save time. A one-stop NFT tool to manage workflows regarding buying, selling, holding, and minting NFTs.

CyberVillainz and CyberHeroez can gain access to this tool via our partnership if they meet certain requirements.

The team dashboard provides:

- NFT/Token Trackers
- Mint Calendar
- Floor Price Alerts
- Price Analytics



CyberVillainz X Heroez

Metaverse Partners

CyberVillainz will be integrated into top-tier metaverses via strategic partnerships.

Sovana

One of the first partners is Sovana. Holding a CyberVillain will allow you to take part in the Sovanaverse for exclusive events, games, and more.

Rumbleworld

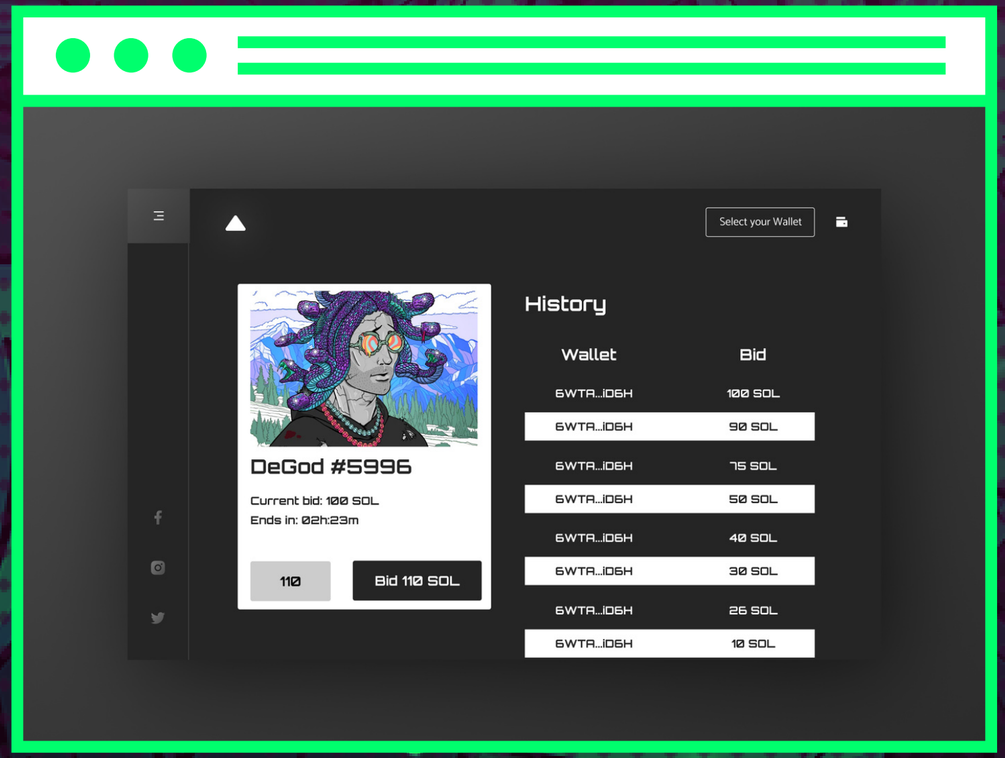
CyberVillainz will also be available as a playable 3D avatar in the upcoming metaverse game Rumbleworld. This 3D avatar is already rigged and ready to go.

CyberVillainz X Heroez

Legendary Auctions

There are 10 Legendary CyberVillainz. The remaining eight will be auctioned on a custom auction house built through our partnership with Solaland.

The auctions will be used to continue funding the DAO wallet, paying staff, and offering lucrative community incentives like NFT giveaways.



This is the example auction page for DeGods.

STAKING

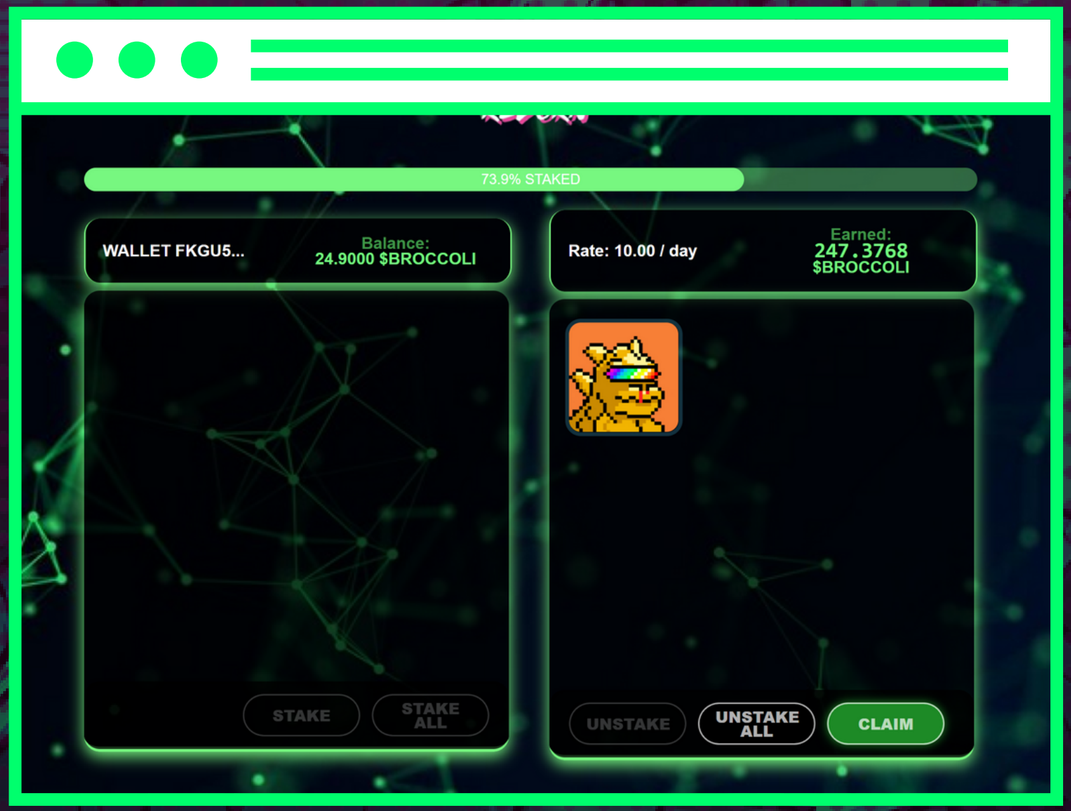
We've partnered with Xin Dragons to do staking for the CyberVillainz and CyberHeroez. Our staking platform is non-custodial meaning the NFTs never leave your wallet.

Below are the daily staking rewards for $BROCCOLI. Holding a Gen 1 and a Gen 2 is the best way to increase yields.

- Gen 1 = 10 $BROCCOLI/day
- Gen 2 = 6 $BROCCOLI/day
- Gen 1 + Gen 2 = 12 $BROCCOLI/day

The $BROCCOLI token is a pure utility token and can be used for auctions, WL raffles, and Project Dolphin access.

CyberVillainz X Heroez



Staking Site

Quest Rewards

Quests increase staking yields for individuals. In addition, there are 3 factions that will have competitions based on "quests" that will result in rewards for holders.

Winners will get weekly airdrops with 1st place receiving 50% of the pot, 2nd place receiving 30%, and 3rd place receiving 20% (subject to change).

In the example, faction B would get the highest rewards at the end of the week.

79%
Faction B on Quest

= 1ST

47%
Faction A on Quest

= 2ND

39%
Faction C On Quest

= 3RD

CyberVillainz X Heroez

Lore

We have hired a well known Lore Master to help build a community-driven story that can keep us engaged and reward members for contributions.

Deliverables

- Background Lore
- 40-Panel Episode / Story
- Lore Prompts
- Rewards System and Bot

In addition, the lore will be used to create a graphic comic book based on the battles between the CyberVillainz and the CyberHeroez.

CyberVillainz X Heroez

Gen 2

CyberHeroez

CyberHeroez are the next generation in the Cyber Brand.

The funds will be used to continue building the CyberVillainz team, finding new utilities, and developing the brand.

- 2,222 Supply
- 2 CyberVillainz + 500 $BROCCOLI = 1 mint
- Holders get discounted mint of 1 CyberHeroez.
- Only 100 Cyber OG roles for non-holders discounted mint of 1 Presale

Discord Trading Tools & Services

CyberVillainz now has a full time dev-ops team dedicated to making effective NFT trading tools and services for CyberVillainz holders, as well as for distribution to other projects as an additional revenue stream to help keep CyberVillainz sustainable and profitable for the long term.

In the future CyberVillainz and CyberHeroez community members will be able to provide tool suggestions, feedback, and take advantage of these products and services as holders.
